

Bookmark Selections is an ArcMap toolbar with five pairs of buttons for bookmarking and restoring the active selection. It will work for any number of selections across any number of layers.

### User Instructions

**Step 1:** Select features to be bookmarked.

**Step 2:** Click any of the green Create Bookmark buttons from the toolbar      and the corresponding Restore Bookmark button  will activate and become available .

**Step 3:** To restore the selection later, click the corresponding Restore Bookmark button     .

### Installation Instructions

**Step 1:** Install Bookmark Selections by double-clicking the add-in file in File Explorer and choosing Install Add-In from the pop-up.

**Step 2:** Close all open ArcMap sessions.

**Step 3:** Open ArcMap.

If the toolbar is not visible, it can be turned on by clicking Customize > Toolbars > Bookmark Selections. Alternatively, just the button can be added to the current interface from Customize > Customize Mode and by then navigating to the Bookmark Selections category.
